About the day

With the rise in prevalence of mental health difficulties in children and young people, there is an increasing need to recognise the range and degree of risks presented by young people. This workshop will provide an excellent opportunity for the delegates to update their understanding and skills in assessment and management of risks in children and young people.

Amongst the discussions will be; Mood Disorders, the impact of media on the mental health of young people, and eating disorders.

Prices

Amongst our aims is the dissemination of information to bridge the gap between rigorous research and best practice in relation to child and adolescent mental health. One of the ways in which we do this is through our events, and we try to make these as accessible and affordable as is reasonably possible. The events we organise are not profit-making, many are subsidised through our other commercial activities, without which they would not be able to run. As a charity, any surplus that we make is invested back into the business to benefit our Members and the sector. Members get a discounted rate and we hope you consider joining.
