Kapur

Prof. Caroline
Richards

Assoc. Prof. Johan
Bjureberg

What factors shape the development and persistence of self-harm in children and young people?

How might neurobiology and emotion regulation deepen our understanding of self-harm?

How should self-injurious behaviour and self-restraint be understood and responded to in children with intellectual disability?

What role can families play in safety planning and recovery following a self-harm crisis?

Don't miss the opportunity to hear directly from leading experts as they explore these questions and more. Register by clicking [here](#).
